VINEYARD DETAILS	HMR Estate Vineyard | 1580 - 1735 feet | Calcareous Limestone Soil

The certified organic vineyards of Adelaida reside in the Santa Lucia Mountain Range on the west side of the Paso Robles AVA. These vineyard sites lie within the *Adelaida District*, a sub-appellation in the northwest corner of the Paso Robles wine region, and are situated on steep hillsides with elevations ranging from 1,400 to 2,050 feet. With limestone subsoils and extreme diurnal temperature swings averaging 45 degrees, Adelaida produces wines with distinct expressions of their site.

The defining narrative for the 2023 vintage at Adelaida was weather: It was the longest and coolest in 12 years. Our vineyards received 30.66 inches of rainfall and experienced a rare year where temperatures remained below 100˚F for the entire season. With an especially cool August and September, we began picking select fruit in early September, but the bulk remained on vine later than typical. There were points when we speculated that ripening might not occur before the rains arrived. Fortunately, October days were warmer, and the rains held out until we completed our final pick on November 8. The fruit was healthy, and the extended time on the vine allowed the grapes to develop extraordinary, deep color profiles, rich tannins, and complex aromatics.

This 2023 Estate Pinot Noir from the historic HMR Estate Vineyard opens with an intriguing and layered aromatic profile, weaving herbal nightshade components with bright notes of rose hips, fresh raspberry, and blue lupin, all complemented by subtle accents of clove and warm vanilla bean. On the palate, it unfolds into a rich tapestry of red fruit, where lush black cherry, raspberry, and dried fig are balanced by delicate hints of rose apple and an edge of warm cardamom and clove. Enjoy now or hold through 2031 to allow the earthy components to develop and intrigue.

VARIETAL	Pinot Noir 100% Planted in 1964	**COOPERAGE**	Aged in French oak barriques (20% new) for 15 months
ALCOHOL	12.8%	**RELEASE**	Spring 2027
